

ZPLI230E THE CONTROL CARD IS INVALID

Problem

When applying a license key by running LICUPDAT, this error shows up in the job output.

Triage

1. Are you at a current enough levelset for the for the machine model type you are using? ⓘ
 - a. If not, you will need to contact customer service for a temp non model specific key [by clicking here](#) or upgrade to a newer version that supports this model type [by clicking here](#) and expanding product updates
2. Are you applying a key for the correct version that you have installed?

- **ZPLI001I SecureZIP(R) for z/OS, Version 15.0g - 09/14/15 13.54 LVL(7)**

```
*---+---1---+---2---+---3---+---4---+---5---+---  
• *LICENSED BY PKWARE, Inc 09/30/15 15.0
```

Escalation

1. Assemble the complete JES output from the LICUPDAT job
2. Open a support case by clicking [here](#) and include:
 - a. The complete JES output from the LICUPDAT job along with the license key are you applying.
 - b. The license key you are applying .INSTLIB(LICENSE)
