

# The PKWARE certificate server is currently offline

## Problem

When attempting to obtain or renew a digital certificate, this message is displayed.

## Solution

PKWARE no longer offers digital certificates with SecureZIP or renewals starting January 1, 2015.

1. While SecureZIP cannot be used to obtain or renew a certificate, you can still use certificates for encryption and decryption. You can obtain an X.509 email certificate from a third party provider such as Comodo, Verisign or generate a self signed certificate using Windows server.
