

How to Extract a ZIP File Using ZIP Reader for FireFox

Step-by-step guide for FireFox Users

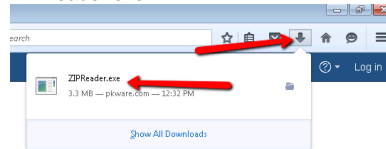

1. Save your ZIP File to the desktop if you received it via email.
2. [Open this link in a new window or tab](#) (right click and choose Open in new Tab)
3. Click on Installers
4. Click on ZIP Reader by PKWARE
5. Click on Save File

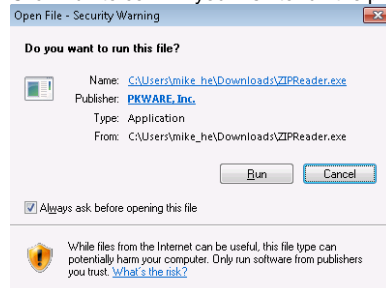

6. By default, you will be prompted to save to your Downloads Folder

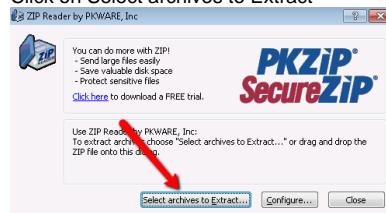

7. Click on the downloads dropdown at the top right corner of FireFox and click on ZIPReader.exe

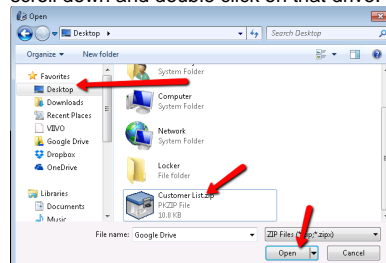

8. Click Run to confirm you wish to run the program

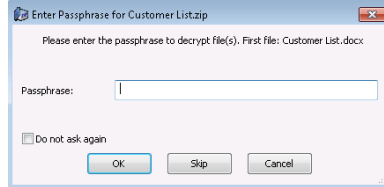

9. Agree to the End user License agreement options
10. Click on Select archives to Extract

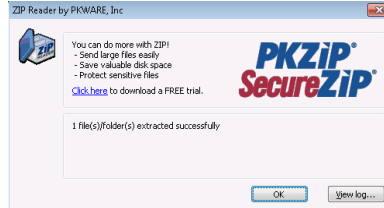

11. Now, tell the ZIP Reader where your zip file is. Click on Desktop, click on the zip file you are working with and click Open. If the zip file is on a CD or DVD drive, scroll down and double click on that drive.

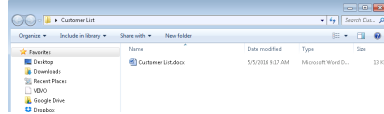

12. If your zip file was encrypted, enter the password or passphrase

13. If the password or passphrase is correct, then your files will be extracted along with a notification

14. Click OK to view the contents from the zip file
