

SNMP

On Linux-based Smartcrypt Enterprise Managers, Admins can access Simple Network Management Protocol (SNMP) data on the system. Configure them on this System page.

Setting	Description
Status	SNMP reporting is Disabled by default. Click the link to Enable .
Agent Address	The network address of the SNMP agent
Read-Only Community	Community credential allowing access to this system's SNMP data
System Contact	Optional: Use this to identify the admin receiving this system's SNMP data
System Location	Optional: Use this to differentiate between monitored SEMs
System Name	Smartcrypt Enterprise Manager by default. You can edit this name.
